

# The Log and Transfer Window from Final Cut Pro 6 and Later

1. Click on the Gear Icon to get to Preferences to choose how you want the video transcoded
2. Click on a clip so you can
  - A. Set In- and Out-points
  - B. Enter a clip name and other metadata
3. Click on Add Clip to Queue
4. Repeat for any other clips you want to bring in

Any clips you choose will be placed in the Capture Scratch folder for the project at hand. You will also see them in your Browser upon completion (you don't need to Import them).
